

NEW

Innovating the Undersea Experience

“A must on my boat for all my underwater needs.”

“I dive less than 30 feet so EasyDive is perfect for me to get the pictures I want.”

“I loved the quick & easy way to snorkel one minute and dive the next.”

- EasyDive users

EasyDive® Kit

The **EasyDive Kit** is a complete minimalist dive & snorkel system. Weighs in at only 15 pounds, and yet provides up to 30 minutes of air! Lightweight and small, it can be donned in seconds - much less time and effort than donning a full set of scuba. You will find all kinds of uses for your **EasyDive Kit**. Perfect for quick response to items dropped over-board, verifying anchor location, prop clearing, pool maintenance, and much more!

The **EasyDive Kit** comes with the NEW patented Snorkelator. No longer limited to the surface and quick underwater swims, snorkelers can take occasional deeper dives to explore the shallows, with less equipment than a full scuba set-up. Switch between breathing off snorkel or regulator with the turn of the dial and just 1 mouthpiece.

Whether you are a boater or snorkeler, EasyDive has the solution to make diving simpler and quicker.

The EasyDive Kit includes a 19 cu. ft. scuba cylinder, custom Harness, unique Tank Valve / 1st Stage combo, 2nd Stage Regulator, Mini Pressure Gauge, Snorkelator (integrated dry snorkel), and Air Compressor Refill Adapter.

Snorkelator®

The **Snorkelator's** patented technology offers divers the ability to combine this snorkel with any diving regulator – creating a truly unique experience.

The Snorkelator comes with a top-of-the-line dry snorkel already attached. Simply attach to any scuba regulator with just a few simple steps and you are ready to go. The **Snorkelator** is perfect for those that love to snorkel and dive and would love the convenience to switch between the two easily and seamlessly. Switching from your regulator to snorkel when surfacing is not only annoying, it can also be a safety hazard.

NOMAD®

The **Nomad** includes a **Spare Air** attached to the **Snorkelator**, making it the most lightweight snorkel and regulator combination available. Together they offer an experience like no other, allowing divers to get in the water to snorkel & dive within seconds.

The Spare Air has a 1.7 or 3.0 cu. ft. tank that gives enough air to give you some bottom time when snorkeling. It's perfect when you need a little more time to get an awesome picture or check out the underside of your boat.

Quickly re-charge the Spare Air from a full scuba tank with the included tank adapter and be back in the water in just seconds.

Product Specifications:

Model	EasyDive Kit	Nomad		Snorkelator
Part Number	700-003	700-002		700-001
Weight	15.0 lbs.	2.5 lbs.	3.0 lbs.	.55 lbs.
Tank Size	19 cu. ft.	1.7 cu. ft.	3.0 cu. ft.	none*
Air Supply	25-30 minutes	32 surface breaths	57 surface breaths	none*

* Snorkelator receives air from the attached SCUBA system and has no inherent air supply
