

Breathing Made Simple

SPARE AIR Xtreme Sport - 170PKX

Dual Sport Model provides as many as 32 surface breaths for a variety of extreme sport emergencies.

Ideal for Extreme Watersports:

Tow-in Surfing

Kayaking

River Rafting

Over the years, kayakers, surfers and other water-sportsmen have been using the Spare Air as a rescue safety device. Their only complaint - they needed a small breathing device that was "hands-free." The Xtreme sport solves this by reducing the size of the air tank and mounting the unit in a chest pocket on a neoprene vest. Now your next breath is only inches away.

Manny Carabello and Danial Andersson from the Xtreme Sport Team have written their thoughts about using the SPARE AIR while tow-in surfing. Visit SpareAirXtreme.com for all the details.

SPARE AIR Xtreme 6 - 600PKX

Up to 20 minutes of air in a compact mini SCUBA system combined with the innovative Snorkelator by EasyDive.

Mini SCUBA ideal for:

Snorkeling

Shallow Reef Diving

Boat Maintenance

Introducing the SPARE AIR Xtreme 6 for SCUBA divers who would like a lighter, easier set-up while snorkeling, performing quick boat maintenance or hunting for scallops & lobsters.

Weighing only 5 pounds, this simple mini SCUBA system utilizes the innovative EasyDive Snorkelator. With the twist of a knob, your next breath can come from a compressed gas cylinder when you need only a breath or two before returning to the surface. A quick twist of the knob back again, and you are breathing through the Snorkelator, conserving your compressed air.

Product Specifications:

Model	Xtreme 6	Dual Sport
Part Number	600PK	170PKX
Product Length	14" [36 cm]	8.75" [22 cm]
Product Diameter	3.25" [8.2 cm]	2.25" [5.7 cm]
Product Weight (full)	5 lbs [2.3 kg]	1.5 lbs [.7 kg]
Pressure Rating	3000 PSI [207 BAR]	
Cylinder Volume	6 cu ft [170 liters]	1.7 cu ft [48 liters]
Cylinder Material	Aluminum - Black Anodized	
Regulator Type	Balanced Piston, On/Off Valve, 27" Flexible Hose & 2nd Stage Regulator	Integrated Balanced Single Stage Demand Always-On Design
Operational Temperature	-22°F [-30°C] to +158°F [+70°C]	
Duration	Up to 20 minutes	32 breaths
	Based on 1.5 liters per breath	

Available Options:

- SCUBA Tank Refill Adapter for 170PKX - P/N 910S
- Air Compressor Refill Adapter for 170PKX - P/N 920C
- Hand Pump - P/N 3100-PUM
- NOMAD II Portable Compressor - P/N 3100-COM-2
